CI/CD for UdaPeople

Paul Owoicho

What is CI/CD?

CI/CD is a set of development practices aimed at automating the building, testing, and deployment of applications.

CI/CD Principles

- Repeatable Reliable Processes
- Automate Everything
- Version Control Everything
- Bring the Pain Forward
- Build-in Quality
- "Done" Means Released
- Everyone is Responsible
- Continuous Improvement

Why CI/CD for UdaPeople?

Less Developer time
spent on bugs from new
code

Less bugs in production
and testing

Faster Deployments
and fewer human errors

Prevent embarrassing
security holes

Less Infrastructure
costs

Why CI/CD for UdaPeople?

Less time to market
(customers)

Reduced downtime

Quick undo to return production to a working state
